STRIKDAS in 'n glas

1. Position provided stencil on the one side of the bowtie and firmly press down using your fingers.

2. Use stencil brush and apply a small amount of paint over the stencil in circular motions (dab the stencil brush on a separate surface to remove excess paint and avoid paint bleeding underneath the surface of the stencil).

3. Remove the stencil. Repeat the process on the other side of the bowtie. Gently wash stencil in warm soapy water and allow to dry.
